[www.lespritclinic.com](http://www.lespritclinic.com)

UltraSlim® is the most powerful and noninvasive red light medical device used to treat visceral and subcutaneous fat, revitalize skin, reduce chronic pain and inflammation - and more!

#### POWERFUL

Using patented diodes, the light of UltraSlim® is able to penetrate deep into the targeted area and improve inner and outer beauty!

#### SAFE

UltraSlim® is FDA-Cleared\* and has no pain or downtime. UltraSlim® is for everyone regardless of age, sex, or skin tone. Anyone can benefit from turning on the light!

#### EFFECTIVE

You can benefit from the process of lipid metabolism, the body's natural fat removal process. In our multisite clinical trials, patients lost an average of 3.5" in just one treatment.

## INNER HEALTH, OUTER BEAUTY

### Body Contouring, No BMI Restrictions

Those who qualify as obese are at an elevated risk for developing chronic conditions such as stroke, type 2 diabetes, heart disease, and cancer. Ask your doctor about the benefit of UltraSlim® for health

### Pain & Inflammation

In just one 40-minute session, UltraSlim® can reduce the pain and inflammation and create relief for those suffering from various ailments.

### Noninvasive Breast Reduction

Invasive breast reductions leave scars and can be very painful for the patient. With UltraSlim®, a noninvasive and safe breast reduction is possible.

### Facial Contouring

UltraSlim® will safely contour sensitive areas such as the face and neck with no adverse outcomes.

# Client Procedure Guide

Thank you for selecting UltraSlim® for your non-invasive body contouring and skin rejuvenation! We appreciate your business and will help you to succeed. Every patient loses fat instantly without dieting, exercise, drugs, or surgery. UltraSlim has instant results and no side effects.

UltraSlim® is painless, non-invasive, and dramatically effective. We use a special type and dose of red light to shrink fat cells and produce collagen, which naturally results in smoother, younger-looking skin with reduced appearance of lines, wrinkles, and dark spots. Increased elastin works with collagen to tighten the skin, for a younger, firmer appearance.

With only 32 minutes of treatment, ladies lose an average of 3.5” from their waist, hips, and thighs. Men lose an average of 3.5” from their chest and abdomen. In clinical trials recorded at ClinicalTrials.gov (NCT02867150), patients averaged 1.6 liters of fat loss at each treatment. Over 98% of patients lost at least two inches of fat at each visit, and every patient lost at least 717cc of fat at each visit (1 5/8”).

Using only phototherapy treatments, UltraSlim® is the only technology for instant fat reduction. UltraSlim devices are manufactured by Ward Photonics LLC in Cocoa Beach, Florida. The FDA has cleared the devices for body contouring (K160880) and skin treatments (K150336) and related patents are pending in 146 countries.

## How Does UltraSlim® Work?

There are no needles, no incisions, and no recovery time. Our technology is based on modulating a specific type of narrowband non-coherent light. The modulated light tricks the mitochondria in the nucleus of the fat cell into creating a transitory pore in the cell membrane, allowing the fatty acids and triglycerides to escape into the interstitial space.

The liberated fat cell contents are then drained by the lymphatic system and processed by the liver and kidneys as part of the body's normal course of detoxification. The pore in the fat cell will close in about 48-72 hours and the liberated contents will be expelled in the client's waste over the next few days.

# Your Treatments, Step-by-Step

Before your first treatment and at your follow-up visit one week after your last treatment, your measurements will be taken and recorded to track your success.

## **1. Before your first treatment:**

- a. Measurements will be taken and recorded on the approved form.
- b. “Before” photos will be taken.
- c. Our staff will ask about your dietary habits and emphasize the need for a balanced, low-fat, diet.
- d. Our staff will also discuss the need for mild physical activity and ask you to commit to, at minimum, walking 30 minutes each day.
- e. All subsequent appointments are scheduled.

## **2. Your first and subsequent treatments:**

- a. You will disrobe, leaving on undergarments to cover the areas that are not to be treated. Cover the areas where the fat is to remain and expose to the light the areas where the fat is to be drained.
- b. The certified technician will position and direct the light at the target areas.
- c. Each treatment session is scheduled for one hour, which includes treatment time, dressing/undressing, etc. UltraSlim treatments are 8 minutes per area and up to six areas may be treated within an hour session. Skin treatments take 20 minutes per exposure (two for the face).
- d. We recommend wearing a compression garment until a week after the final treatment.

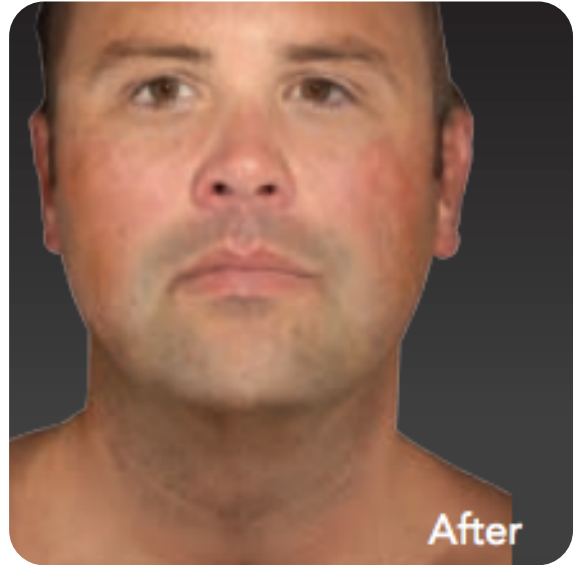

## What You Can Expect

The patented UltraSlim® body protocol yields immediate, measurable results. Expect to lose at least two inches of fat from your waist, hips, and thighs at the very first visit.

To minimize fat reduction in the face while promoting collagen and elastin, UltraSlim Facial treatments are 20 minutes with the UltraSlim programmed for the appropriate biomodulation. With facial treatments, expect to see your face appear 10 to 15 years younger with the complete series.

As with any procedure, results will vary and may be more dramatic from one client to the next. And results will vary depending on the protocol that you use.

# BEFORE/AFTER

## Happy Clients Say:

*Dr. Asharaf Dabawala*

*"I have lost two belt sizes, and my sugar has gone down by 30% [with only one UltraSlim treatment]."*

*Hannah W.*

*"It was difficult to lose the weight post-pregnancy and keep it off but with UltraSlim, I could fit into my jeans again! I was consistent in my treatment plan and lost 60 pounds with UltraSlim! I feel so happy, and my family feels it, too!"*

*Pia M.*

*"These results are phenomenal - I am halfway through my treatment plan, and I've already lost a pant size! Getting these immediate results is something I never thought was possible at my age - it's just incredible."*
